Dear Partners,

After more than a decade of cooperation with our primary foreign partner Korsholm A / S, observing the changes on the commercial hunting market and the growing interest of our customers to contact us directly and shorten the supply chain, we decided to combine potentials of Messer sp. z o. o. and Korsholm.

As a result of talks that have been ongoing since 2019, from 01.07.2020 Messer has taken over the activity, trademark *Korsholm Jagtrejser* and dealers, who will from then on represent our brand in Scandinavia and use the existing headquarter in Skjern.

We are deeply convinced that the above changes will improve communication with all our regular polish partners, and knowledge about the expectations of our customers. Within the framework of a new and broader structure, our hunting sales opportunities will increase. However, Poland will remain as the fundamental destination in our offer.

Moreover, the benefits from the takeover will include an improvement of our travel offer to the level previously unattainable. Beyond Africa and Austria, already available in our offer, the list of directions will be enriched by Romania, Hungary, Greenland, Great Britain and Germany.

We want to encourage our domestic partners and clients, not only to cooperate with us as far as commercial hunting in Poland is concerned but also to take the opportunity to discover a hunting world with a professional and experienced broker.

This is the first such significant step in the development of Messer in recent years, but we guarantee that it will not be the last. We are planning further innovative projects aimed at simplifying the schemes, improving the quality of service for both our domestic as well as foreign partners and customers.

We hope for your support and the development of our cooperation so far, and we will soon present a complete travel offer. We encourage you to explore the hunting world with Messer.

Yours faithfully,
